

BUDVAR

windows more lasting than others

T-CLASSIC | CLASSIC WINDOWS FOR EVERY HOME

Six-chamber profile with a frame depth of 70 mm with the option of fitting with 3 seals.

Perfectly even, invisible V-Perfect that guarantees excellent aesthetics and extended window life.

The classic oval shape of the window frame adds elegance to the interior.

T-Classic windows – classics at its best

T-Classic are windows with a streamlined form, created for those who appreciate timeless aesthetics. Thanks to the good quality-to-price ratio, the windows are perfect for small residential houses and multi-family buildings.

Titanium Technology - windows more durable than others

T-Classic window profiles are manufactured using modern Titanium Technology. Thanks to the combination – at the stage of plastic processing – of full-grade PVC with an admixture of titanium oxide, a window profile is created, which is characterized by high rigidity, high resistance to discoloration, and harmful effects of sunlight.

Patented third gasket system with clipto seal the window

Budvar windows are the only ones on the market with a two-component proprietary MD system, which consists of a third gasket and a special clip mounted in the frame. This solution significantly strengthens the thermal, acoustic and even security of the window - the clip provides additional anti-burglary protection, making it impossible to move the hardware from the outside.

Original design

At Budvar, we design and produce the PVC profiles ourselves, controlling the quality of our windows and doors right from the start.

wide range of colours

from classic white to the most fashionable Earth colors – on one or both sides

classic construction

timeless, oval-shaped profile edges

profile colored in mass

the color of the interior of the window on both sides, visible after opening it is matched to the color of the veneer: **white, caramel, brown, anthracite**

The low frame and sash, as well as the narrow mullion with a centrally located handle, provide more glass area and thus more daylight in the room.

V-Perfect weld and slim, rounded profile shapes are a symbol of timeless design.

T-Classic Slim - slim windows, that will fill your home with light

Open up to daylight with T-Classic Slim windows. Thanks to its slim design and low folding of the frame and sash, the T-Classic Slim window will let up to 27% more light into your home! The extra sunlight in the room promotes reduced energy consumption, which translates into lower bills and a positive impact on the environment.

Titanium Technology - windows more durable than others

T-Classic Slim window profiles are manufactured using modern Titanium Technology. Thanks to the combination – at the stage of plastic processing – of full-grade PVC with an admixture of titanium oxide, a window profile is created, which is characterized by high rigidity, high resistance to discoloration, and harmful effects of sunlight.

The mullion design allows for a larger glass area guaranteeing more daylight in the room.

Perfectly even, invisible V-Perfect welds, guaranteeing excellent aesthetics and extended window life.

Innovative sash shape with overlapping frame drip rail.

T-Classic Plus – windows for the especially demanding

T-Classic Plus is a designer window designed for people who are looking for unique solutions. The innovative rounded shape of the window, with an overlapping drip rail on the frame, makes the T-Classic Plus window look extremely stylish. The thoroughly designed and tested construction of the window, in addition to its aesthetic qualities, provides very high thermal and acoustic insulation parameters.

Titanium Technology – windows more durable than others

T-Classic Plus window profiles are manufactured using modern Titanium Technology. Thanks to the combination – at the stage of plastic processing – of full-grade PVC with an admixture of titanium oxide, a window profile is created, which is characterized by high rigidity, high resistance to discoloration, and harmful effects of sunlight.

Ecology

The profiles of the T-Classic family are certified to be free of lead, cadmium and compounds of other heavy metals. By choosing our windows, you can be sure that you are contributing to ensuring that the world around us is not polluted by these harmful substances.

Remember to mount properly

Dear Customer, if you want our windows to serve you for many years, maintaining their technical parameters and ensuring your safety, take care of their correct installation. The solution that will provide you with the highest insulation parameters is the so-called warm installation.
